

Product DISCLAIMER

Information contained within this website is to be a general guide to various conditions customers request information about. This general advice, whilst researched and verified in depth, cannot cover every specific situation encountered by every single individual that has used any of the machines and products, presented herein, over the past nineteen years or so of production.

You should seek out multiple sources of independent health care advice regarding your personal health condition, besides the information and guidance contained within this website. Seek advice from your medical specialist, general practitioner, chiropractor, naturopath, massage therapist or any other health care practitioner that you trust.

If your health care specialist has no knowledge of the machines, products and therapies contained within this website, **seek out someone that does**. Many health care specialists are uneducated as to the Sun Ancon Chi Machine, Far Infrared therapy and Electrotherapy or their medically proven related benefits. Many of these practitioners have yet to research, experience and understand these alternative health care therapies, even though they have been available for many years.

Health care specialist knowledge varies from country to country and is dependent upon health education standards, available research institutions, government regulations and laws, and consumer demand. Whereas many countries promote alternative health care, many countries do not, due to culture preference, or lack of financial aid and medical technology, or corporate greed and control.

It must be noted that the [Sun Ancon Chi Machine](#), the [Far Infrared Hothouse Dome](#), the [ERE](#) and the [E-Power](#) all originate from Japan, the country which has the highest ranking health level in the world, whereas the US ranks amongst the lowest.

Testimonials presented herein come from customers and health care specialists across the globe that want to share the benefits and results they have received personally. The Chi Machine, for example, has helped over two million people but like **ALL** global therapies, **CANNOT** be claimed to 'cure' or benefit **EVERYONE** of any specific health challenge, because everyone has different karma, diet, emotions, mental state and environmental conditions.

Simply put -

WHAT WORKS FOR ONE PERSON DOES NOT MEAN IT WILL WORK THE EXACT SAME WAY FOR ANOTHER.

Chi Machine International and Hsin Ten Enterprises (HTE), will not be responsible for the affects of using HTE products which may prove to be adversary to any individuals particular health status. This website provides individual experiences and extensive research, but is subject to your agreement to obtain independent healthcare guidance if you so desire, and of course personal discretion and common sense.

NOTE:

All four HTE machines that we have on this webiste have been approved, classified and recognized as medical device in [Canada, Australia and Japan](#), but not by the FDA in America.

**FDA Classification for HTE USA Products
and Required Disclaimer.**

The FDA in the USA does not recognize the Chi Machine, the Hothouse, the Electro Reflex Energizer or the E-Power as medical device. To obtain such classification from the FDA would be extraordinarily expensive and take a long time to approve. Thus, the machines are classified in the USA as Regulation Class 1:

The Chi Machine is Regulated as a Class 1 Therapeutic Massager - [FDA Listing](#)

The Far Infrared Hothouse is Regulated as a Class 1 Powered Heating Unit - [FDA Listing](#)

The Electro Reflex Energizer is Regulated as a Class 1 Therapeutic Electric Massager - [FDA Class](#)

The E-Power is Regulated as a Class 1 - [FDA Class](#)

FDA Required Disclaimer:

Statements on this website have not been evaluated by the FDA - the Food and Drug Administration. HTE products are not intended to diagnose, cure or prevent any disease. No product can seriously claim to do so - too many factors are involved for each and every individual.

The information provided on this website is for informational purposes. Information is not intended as a substitute for advice from your personal physician or other health care professional that you trust, and should not be construed as individual medical advice.

If you are under a doctor's care, please consult with her/him prior to use of these products. If a condition persists, please contact your physician for advice.

Any testimonials on this website are from individual cases and do not guarantee in any way, shape or form that you will get the same results.

Classification outside of USA:

The Sun Ancon Chi Machine, the Far Infrared Hothouse, the ERE and the E-Power are all recognized, classified, approved and certified as **MEDICAL DEVICE** in [Canada, Australia and Japan](#).

It must be noted that:

a) Australian and Canadian health regulations are extraordinarily strict and such classification is not easily or lightly obtained.

b) Japan ranks as having the highest health level in the world, whereas the US ranks among the lowest. All four machines were created by Japanese scientists, with exclusive distribution rights given to HTE.

HTE, is the international company that has the exclusive rights to manufacture, import and sell these machines in the USA, since U.S. establishment in 1993 - company actually established in 1990 in Taiwan.

HTE, the company and manufacturer of these four machines, **has never had a consumer lawsuit or consumer injury during the past 20 years of doing business worldwide** - quite an accomplishment!

Personal Note:

As a consumer, just like the reader of this page, it does not make sense that things can be classified differently in different locations and different countries - either it is, or it isn't so to speak - but matters are not always so clear cut...

Everyday examples:

- 1) In the USA, why can a masseuse be certified in one city, district or state, but uncertified in another just miles away?
- 2) Why is it that scientific research and information proving that certain products are either truly harmful or truly healing, banned from being revealed to the public?
- 3) Why is it that certain products and services can be sold and offered in one country but banned in another?
- 4) Machines, such as those above, are recognized as medical device in certain countries, but refuted as such by a country a few steps across an invisible border?

Such are the laws and regulations of government and corporations ruled by politics and semantics, often defined by money and religion, over which the average consumer or merchant has minimal, to restricted, to no jurisdiction.

The good news is that there is barely a corner on earth that International marketing cannot reach and business is now truly global thus enabling the consumer to be able to research and obtain any product or service they desire.

Chi Machine International's mission is simply to make a difference and reach out and help individuals worldwide to the very best of our ability with integrity, sincerity, compassion and honesty.
